

Cardio Health Pack

Product Reference Sheet

The Most Complete Cardiovascular Support System Available.

Waiora's **Cardio Health Pack** combines all natural ingredients, the latest nutritional science and the research of two Nobel Prize-winning scientists to provide you with a complete solution to support your heart and cardiovascular health. The Cardio Health Pack is formulated by a leading authority in nutrition and approved by an elite board of physicians to ensure quality and efficacy.

Item No. 25000 (Original)

Item No. 25020 (Natural)

MEMBER: \$119.95 / Retail: \$149.85

• Key Benefits

- Strengthens your heart muscle.*
- Supports a healthy heart rhythm.*
- Helps maintain the elasticity of blood vessels.*
- Helps reduce the absorption of bad cholesterol (LDL).*
- Helps fight the build up of arterial plaque.*
- Helps support healthy blood pressure levels.*
- Helps fight damage to your cells and organs caused by free radicals.*

• Your Heart is Too Important to Neglect.

With heart disease and stroke reaching epidemic proportions, blood pressure and cholesterol levels at an all-time high, and dangerous prescription medications being pulled from the market, Waiora has designed a safe, natural heart-healthy alternative.

Considered by our Scientific Advisory Board as the most complete cardiovascular system on the market today, the **Cardio Health Pack** combines a targeted heart supplement with efficacious amounts of vitamins and minerals (**Essential Heart Complex**), a delicious fiber drink mix containing cholesterol-reducing plant sterols (**Superior Fiber Blend**), and a superior whole-food antioxidant supplement that is equivalent to 10 servings of fruits and vegetables (**Advanced Antioxidant Formula**). These products combine to help fight arterial plaque, preserve elasticity of blood vessels, reduce absorption of bad (LDL) cholesterol, strengthen your heart and promote a healthy flow of oxygenated blood throughout your body.*

• A Doctor's Advice

"Heart disease, in spite of our best efforts at treatment, is ultimately fatal and disturbingly frequent. Those that survive, have irreparable damage to the heart muscle. Clearly, prevention of heart disease is more effective than treatment. We need to expand our approach to prevention to incorporate nutritional factors which are proven to diminish the development of atherosclerosis."—*Steven T., M.D., MN*

• Testimonials

"Sixteen years ago, hours after open-heart surgery, I learned two important lessons. First, heart attacks don't always happen to someone else. And second, heart surgery treats the symptoms not the disease. As a survivor, I implore you to make the time to address your health now, while you still have it." † —*Ron W., WA.*

"In December 2004, my total cholesterol was 275 and my bad cholesterol (LDL) was 196. Eight weeks after starting Superior Fiber Blend, my LDL dropped to 142 and my good cholesterol (HDL) increased from the low 30s to 44. My doctor is amazed and so am I." †
—*Mike S., Oregon*
